Obtain maximum yields with proprietary chemistry and advice that you can trust.

Pre-emergence weed control

Ethosat[®]
10 Litre

ETHOSAT provides effective control of barley grass in pasture and weed control in ryegrass turf and beet.

Nortron[®]
20 Litre

Nortron - The first choice in pre-emergent weed control in rye grasses and beet crops for the control of annual poa and broad-leaved weeds.

Firebird[®]
5 Litre & 10 Litre

Firebird is a pre-emergence herbicide that controls a wide range of key arable weeds in both wheat and barley. Weeds such as vulpia hair grass, an increasing problem on Canterbury farms; annual poa, found in most arable paddocks, field pansy, speedwell and field madder.

Order 2x10L drums of Firebird[®] before the 31st of March and receive a free umbrella

Keep the pests away

Mesurol[®] pro
25 kilograms

Mesurol Pro is a highly effective, new formulation slug and snail bait. Mesurol Pro controls all species of slugs, and works in all weather, meaning slug and snail populations do not recover.

SuSCon Green[®]
15 kilograms

SuSCon Green is a controlled release granule for the control of grass grub in newly established pasture and clover seed crops for up to 3 years.
