

BUSHY DOWNS HEREFORDS

• Est. 1943 •

62nd Annual Hereford Bull Sale

WED 23RD SEPT 2026 12 NOON

VENUE: ON FARM, 660 Ngaroma Rd, Te Awamutu.

Also available online on [bidr](#)

50 TOP YEARLING BULLS & 62 2-YEAR OLD BULLS

All Bulls are TB tested and BVD clear and twice vaccinated

BUSHY DOWNS HEREFORDS

• Est. 1943 •

WELCOME TO BUSHY DOWNS 62nd ANNUAL HEREFORD BULL SALE 50 TOP YEARLING HEREFORD BULLS & 62 2YR HEREFORD BULLS

Sale held undercover • Luncheon Provided.

This year again we are offering an outstanding line of exceptionally quiet Hereford bulls. These bulls present the opportunity to add significant value to your beef or dairy breeding operation. We look forward to your support in 2026.

Bulls will be transported locally free of charge the week of the sale.

Free grazing is available until 1st November 2026.

Payment due 20th October 2026

ANIMAL DETAILS

- All bulls registered and performance recorded.
- Easy to handle, exceptional temperament.
- Commercially farmed bulls on rolling/hill country.
- Farmed in large mobs and electric fence trained.
- Bulls TB tested (negative) on 31 July 2026 .
Herd Status C10.
- Bulls BVD tested (negative) and vaccinated twice with Bovilis BVD. (Annual booster shot required to maintain protection).
- Good selection of short gestation and low birth weight bulls.
- All bulls have been DNA analysed for sire verification and enhanced EBV evaluation.

STUD DETAILS

Bushy Downs Stud was established in 1943 by Martin Port here on this property. Robert and Marian Port continued building the stud from the 1970's. The Bushy Downs farm has been managed by Kelvin and Cynthia Port since 2017.

Bushy Downs property is 340ha with 45ha in native bush reserve. There is also a 25ha runoff. The farm winters over 500 cattle and 1000 sheep. Our bulls are grassfed and supplemented only with grass silage.

Herd breeding priorities and objectives include having structurally sound cattle with a quiet temperament. There is a focus on fertile animals that will calve easily whilst maintaining good rates of growth. Bushy Downs has been successfully mating heifers to calve at 2 yrs of age since 1989.

30		G
2 yr bulls	=	H
		I
26		J
1 yr bulls	=	

- Bulls will be sold in Pen order and Lot order where possible.
- Sale will be conducted under the terms of the New Zealand Stock and Station Agent's Association conditions of sale.
- Lot and tag numbers will be displayed as bulls enter the sale ring.
- Bulls will be put through the ring in pairs of similar size and type. You will be bidding per animal for your choice or the pair.
- Each animal has it's horn status noted next to it's name and number. PP Polled indicates genomically tested bulls that carry two copies of the polled gene (Homozygous Polled). Letters in the pedigree refer to (P) Polled, (S) Scurred, (H) Horned and (J) Pure Horned

PRE-SALE STOCKYARD DISPLAY PLAN

- Each lot becomes the risk of the purchaser at the fall of the hammer.
- FMG will be on-site the day of the sale offering insurance.
- DISCLAIMER:** The BREEDPLAN Estimated Breeding Values (EBVs) contained within this sale catalogue were compiled by the Agricultural Business Research Institute (ABRI) from the data supplied by breeders. Neither Hereford NZ nor ABRI oversee or audit the collection of this data.

ESTIMATED BREEDING VALUES (EBVs)

EBV's are the best estimate of an animals genetic merit for each given trait.

CALVING EASE DIRECT EBV - CE DIR (%)

The EBV for direct calving ease indicates the influence of the sire on calving ease in purebred females calving at two years of age. Higher values indicate better calving ease.

CALVING EASE DAUGHTERS EBV - CE DTRS (%)

The EBV for daughters' calving ease indicates how easily that sire's daughters will calve at two years of age. Higher values indicate better calving ease.

GESTATION EBV - GL (days)

Is an estimate of the time from conception to the birth of the calf and is based on AI and hand mating records. Lower (negative) GL EBVs indicate shorter gestation length and therefore easier calving and increased growth after birth.

BIRTH WEIGHT EBV - BWT (kg)

Is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200 DAY GROWTH EBV - 200 (kg)

Estimated of the animal's genetic merit for 200 day growth calculated independently of the maternal milk effect.

400 DAY WEIGHT EBV - 400 (kg)

This EBV gives us an estimation of the animal's yearling weight potential.

600 DAY WEIGHT EBV - 600 (kg)

This EBV is an estimation of the animal's genetic potential for growth to 600 days (or 18 months).

MILK EBV - Milk (kg)

The EBV gives us an estimation of the animal's milking potential. The value is calculated from the weaning weights of the animal's progeny and other relatives. The 200 day Milk EBV is calculated independently from 200 day growth.

SCROTAL SIZE EBV - SS (cm)

SS scrotal size EBV (cm) is an indicator of the male fertility in regard to semen quality and quantity. Higher EBV's indicate higher fertility. It is also positively associated with female fertility.

Bushy Downs Sale Bulls EBV Averages for 2026:		2026 NZ Breed Average EBV's for 2024 born animals

BULL-PROOF

YOUR ASSETS AGAINST RURAL THEFT.

Theft and burglaries occur more often than you think, and the number of theft claims is increasing.

Every year FMG supports over 1,000 families impacted by theft and burglary. Alarming, 1 in 5 clients at rural addresses have been targeted more than once in the same year!

We think now's the time to put a lock on that trend. We have teamed up with NZ Police to create a Rural Crime Prevention Guide to help prevent theft and burglaries at your rural property – find out more at fmg.co.nz/rural-theft

We're here for the good of the country.

vetora

We are a farmer-owned vet club practice, servicing the Waikato with a comprehensive range of veterinary services and quality animal health products.

FMG Premier Bull Sale Insurance Form

What is FMG Premier Bull Insurance?

On receiving a completed FMG Premier Bull Sale Insurance form from an existing FMG client, FMG provides insurance cover for bulls including theft, death caused by certain accidents, injury, disease, illness or humane destruction and permanent infertility, provided the bull's purchase price does not exceed \$50,000 +GST. Please contact an FMG representative if you are not an FMG client, or you purchased a bull for over \$50,000+GST.

What is the length of cover?

Your specified bull(s) can be insured for up to 12 months on FMG Premier Bull Sale Insurance.

What are the benefits?

✓ Infertility	Cover if your specified bull has to be intentionally slaughtered due to permanent infertility caused by certain accidents, disease, or illness.
✓ Theft or death	Cover for your specified bull for theft or death caused by certain accidents, disease, injury, or illness (including while in transit anywhere in New Zealand).
✓ Vet costs	Cover up to \$500 for treatment of your specified bull to prevent death.

What will FMG pay?

FMG will pay the fair market value of your specified bull, less any amount you receive for the sale of the carcass, up to the amount shown on the insurance certificate.

03/26 INHD

Apply

Please fill in this form as soon as you have purchased your new bull(s) and hand it to your FMG representative. This form **MUST** be fully completed for Premier Bull Sale Insurance.
